Craft Instructions

# Paper Plate Firefighters Helmet

## Supplies

- 1 paper plate per hat
- Card
- Paint
- Felt tip pens
- Scissors
- Pencil
- Black felt tip
- Glue stick
- PVA glue

1 Carefully cut out the centre circle of the paper plate without damaging the outer rim. Keep the Circle as this will be the front your helmet.

2 Draw and cut out a shallow semi-circle from the card. This will form the rim for the front of the hat.

3 Paint both parts of the paper plate, along with the card, then leave to dry.

4 Now design a badge for the front of the hat! Then cut this out.

5 Using the glue stick, attach the badge to the top part of the hat. You may want to draw around the outline of the badge, using a felt tip pen.

6 Now attach the top part of the hat to the circular rim. To do this, first cut a small slit in opposite sides of the rim. Then slot the top part of the hat into these and stick in place at an angle.

7 Next stick the semi-circle shaped piece of card to the front of the hat using PVA glue.
