Rounding 2 Star Challenge

Can you round these numbers to the nearest 10? Look at the number line below to remind yourself of when to round up or down.

If the number has 0, 1, 2, 3 or 4 **units** it rounds down to the last multiple of 10.

If the number has 5, 6, 7, 8 or 9 **units** it rounds up to the next multiple of 10.

So, 18 would round up to 20.

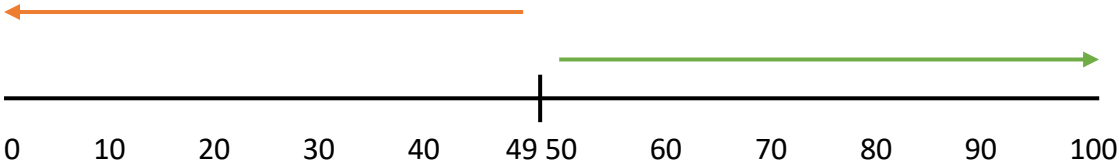

24 would round down to 20.

Have a go at these questions, writing your answers out like this;

Example: 18 – 20

1. 8
2. 15
3. 27
4. 47
5. 32
6. 72
7. 56
8. 41
9. 65
10. 84

Now have a go at rounding to the nearest 100. The same thing applies but this time we look at the **tens**.

If the number has 0, 1, 2, 3 or 4 **tens**, it rounds down to the last multiple of 100.

If the number has 5, 6, 7, 8 or 9 **tens**, it rounds up to the next multiple of 100.

So, 163 would round up to 200.

115 would round down to 100.

Have a go at these questions, writing your answers out like this;

Example: 123 – 100

11.119
12.134
13.156
14.199
15.206
16.249
17.283
18.310
19.358
20.390
21.444
22.470
23.529
24.585
25.673
