Rounding 3 Star Challenge

Can you round these numbers to the nearest 100? Look at the number line below to remind yourself of when to round up or down.

If the number has 0, 1, 2, 3 or 4 **tens**, it rounds down to the last multiple of 100.

If the number has 5, 6, 7, 8 or 9 **tens**, it rounds up to the next multiple of 100.
So, 163 would round up to 200.

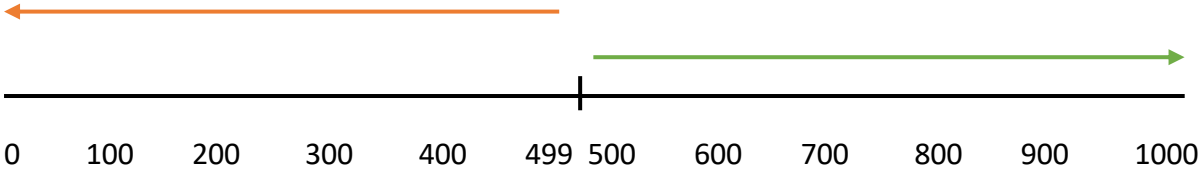

115 would round down to 100.

Have a go at these questions, writing your answers out like this;

Example: 123 – 100

1. 119
2. 134
3. 156
4. 199
5. 206
6. 249
7. 283
8. 310
9. 358
10. 390
11. 444
12. 470
13. 529
14. 585
15. 673

Now, let's have a look at rounding to the nearest 1000. This time we look at the **hundreds**.

If the number has 0, 1, 2, 3 or 4 **hundreds**, it rounds down to the last multiple of 1000.

If the number has 5, 6, 7, 8 or 9 **hundreds**, it rounds up to the next multiple of 1000.

So, 1670 would round up to 2000.

1255 would round down to 1000.

Have a go at these questions, writing your answers out like this;

Example: 1340 – 1000

16.1154
17.1690
18.1450
19.2078
20.2764
21.3247
22.3591
23.4334
24.4812
25.5004
26.5910
27.6492
28.6113
29.6936
30.7500
