Maths and Numeracy 2 Star Challenge

Below are a list of rainforest rivers and their lengths. Your questions will be based on these numbers.

River	Length (KM)
Amazon	6400
Rio Negro	2250
Madeira	3380
Tocantins	2450
Congo	4700
Daintree	140
Mekong	4350
Rio Coco	750
Kinabatangan	560

Have a go at answering these questions. You can use whichever method you feel most confident using, to work them out.

1. Which river is the longest?
2. Which river is the shortest?
3. Can you put the rivers in order, from shortest to longest?
4. How many hundreds does the Amazon have?
5. How many thousands does the Congo have?
6. Can you round the Tocantins to the nearest thousand?
7. Can you round the Mekong to the nearest hundred?
8. What is the total length of the Daintree and Kinabatangan combined?
9. What is the total length of the Rio Coco and the Kinabatangan combined?
10. What is the different between the Rio Coco and the Daintree?
