Maths and Numeracy 3 Star Challenge

Below are a list of rainforest rivers and their lengths. Your questions will be based on these numbers.

River	Length (KM)
Amazon	6400
Rio Negro	2250
Madeira	3380
Tocantins	2450
Congo	4700
Daintree	140
Mekong	4350
Rio Coco	750
Kinabatangan	560

Have a go at answering the questions below. You can use whichever method you are most confident using, to answer the questions.

1. Which river is the longest?
2. Which river is the shortest?
3. Can you put the rivers in order, from shortest to longest?
4. Can you round the Madeira to the nearest thousand?
5. Can you round the Tocantins to the nearest thousand?
6. How long are the Rio Coco and Kinabatangan river together?
7. How long are the Mekong and Tocantins rivers together?
8. How long are the Amazon and Madeira rivers together?
9. What is the different between the Madeira and Rio Negro?
10. What is the different between the Congo and Mekong rivers?
11. What is double the length of the Daintree?
12. What is double the length of the Kinabatangan?
13. What is half the length of the Kinabatangan?
14. What is half the length of the Rio Coco?
