

Pontarddulais Primary School

Remote Learning- Summer Term 2020

Nursery Class

Lead By Example

When you want to introduce your child to a new activity, show by your own example. Begin the activity yourself and then let your child carry on or take over as they work out what you are doing. Teachers call this 'modelling'. Don't put pressure on your child to advance too quickly; let them enjoy repeating the things they have learnt over and over. We all enjoy repeating things we do well, and children are no exception. Celebrate their successes and encourage them to repeat these often.

Here are some activities you can do at home with your child over the next week. Please complete as many as you and your family have time to do.

Activity 1- Language, Literacy and Communication

Hold a Family Tea Party

Ask your child to help you take part in a family tea party. You will need to make decorations, write invitations, make sandwiches and snacks, play with tea pots and cups in water and play two party games.

Article 28: You have the right to a good quality education and your education should help you use and develop your talents and abilities.

Activity 2- Mathematical Development

Before the activity you will have to make and cut out numicon shapes, you can find images here

<https://www.twinkl.co.uk/resource/t-n-705-counting-number-sh>

Jumbled shapes- start simply by using only shapes 1-6.

Show your child what to do by first putting the shapes in order 1-6.

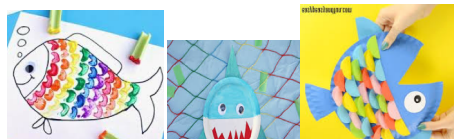

Now jumble them up and ask your child to put them in size order starting with the smallest. Gradually introduce more shapes until your child can put the shapes from 1-10 in order independently.

Activity 3- Creative Development

Find and listen to the story 'The Rainbowfish' on YouTube

Once you have listen to and discussed the story together with you child, make beautiful sea creatures to decorate your child's bedroom. Talk about colour, textures and what makes someone beautiful both on the inside and the outside.

Pinterest has some great ideas, search children's crafts sea creatures

Activity 4- Physical Development

In the Army

In your back garden build an army assault course and time each member of the family. Who will complete the course in the fastest time? You could even make some water bombs to try to slow Mum and Dad down!
